

Maths Task – 12.6.20

MNP Workbook: 3A

Chapter 7: Volume

Lesson 5&6: Writing Volume in Litres and Millilitres

(pages 188-190)

Skill: I can measure volume in millilitres and litres.

Well done on completing yesterday's Maths task. Today we will continue our work on measuring volume and we will look more closely at writing volume in both millilitres and litres.

In Focus

How many millilitres make 1 litre?

$$1 \text{ l} = 1000 \text{ ml}$$

$$100 \text{ ml} + 100 \text{ ml} + 100 \text{ ml} + 100 \text{ ml} + 100 \text{ ml} \\ + 100 \text{ ml} + 100 \text{ ml} + 100 \text{ ml} + 100 \text{ ml} + 100 \text{ ml} = 1000 \text{ ml}$$

1000 millilitres make up 1 litre.

Are there other ways to make 1000 ml or 1 l?

Let's Learn

$$500 + 500 = 1000$$

2 How much more water is needed to make 1 l?

$$1000 - 350 = 650$$

Another 650 ml of water is needed.

Complete the Guided Practice below.

Guided Practice

1 Find the total volume.

ml

2 How much more water is needed to make 900 ml?

ml

3 How much water remains after 225 ml is used?

ml
