

Picture activity sheet

Spot the single-use plastic

It can be surprising to see how much plastic we use in our everyday lives. Single-use plastic (plastic we use just once or for less than a week) is the biggest cause of ocean plastic pollution.

Instructions:

Can you identify the single-use plastic in the pictures below? Is it really needed? What could be used instead? Use a coloured pen or pencil to circle all the single-use plastic you can see in each picture. If you're feeling creative, why not colour in the pictures.

1. The football tournament and picnic

(This picture of the picnic and football tournament took place prior to the pandemic restrictions.)
